Alyse,

Mary was briefed today and is fine with moving the QAPP forward to parties for collecting the on/around site sediment sampling. Please forward at your earliest convenience and I will coordinate with EMSI, field OSC and contractor for split analyses.

Thanks,

Very comfortable with the informal ask and ready to have someone go “any day” per Tom as we have folks in the field already to collect them. We would need 3 or so days to set up a PR with lab and set up storage until samples can be run. Just wanted you to have this item, once we brief Mary tomorrow so it can be ready to move forward if that is the decision.

Thanks, Alyse.

Thanks Brad –

Maybe I misunderstood yesterday but are we needing to check in with Mary first, or

should I go ahead and send this to the PRPs? Also when should I say that we are ready to have someone out in the field to collect samples or splits? Lastly, I could do this request as a formal one for additional work under one of our orders, but since this is a fairly short term event are you comfortable with me asking the PRPs to do this informally?

Subject: WLL - Approved QAPP for sediment sampling

Lynn/Alyse,

Per our conversation yesterday, here is the revised and final sediment sampling QAPP for collection of samples following the December high precipitation event. Please share this with the PRPs and Tom and I will coordinate as needed with our OSCs and EMSI to collect these samples.

Thanks,
